Description

This .tar file got tarred a lot.

Like the name itself we have extract like a thousand times then we will get the flag

```
1 import tarfile #Module used to work with tar files
2
3 for i in range(1000, 0, -1): #For loop from 999 to 0 going down by 1
4     filename = str(i) + '.tar' #Get the name of the file
5     #print(filename) - just for debug
6     tar = tarfile.open(filename) #Open the file
7     tar.extractall() #Extract what in the file
8     tar.close() #Close the file
9
10
11
```

```
import tarfile #Module used to work with tar files
```

```
for i in range(1000, 0, -1): #For loop from 999 to 0 going down by 1
```

```
    filename = str(i) + '.tar' #Get the name of the file
```

```
    #print(filename) - just for debug
```

```
    tar = tarfile.open(filename) #Open the file
```

```
    tar.extractall() #Extract what in the file
```

```
    tar.close() #Close the file
```
